

# GUIDELINES FOR PROFESSIONAL SERVICES

## DIVISION 34 – TRANSPORTATION

The following items are to be included on the drawings and in the specifications by the Design Professional:

### I. CONCURRENCY

- A. Section 235.193 of the Florida Statutes requires coordination of planning with local governing bodies. The Director of Construction Services will determine if a specific project is covered by this Statute or under an Interlocal agreement. The A/E shall formally request from the Director of Construction Services an opinion as to whether or not concurrency applies to their project.

### II. SITE CONSIDERATIONS

#### A. Transportation

- 1. Survey existing traffic patterns, condition of existing road capacities and accessibility to site. Review with the appropriate governing agency and the State Department of Transportation.
- 2. Review preliminary planning with the appropriate governing agency and State for future plans for the area adjacent to the school.

### III. FUNCTIONAL RELATIONS

#### A. Building Guidelines

- 1. Master plan wherever possible the total anticipated complex so that drives, utilities and related items are appropriately sized and located for future expansion of the campus.
- 2. Provide designated areas of campus facilities that can be used for off-hour use by school advisory groups, community and civic organizations that can be properly controlled and have minimal energy consuming effect.
- 3. School buses currently in use by the Board have a minimum turning radius of 60 feet. All new campus designs shall conform to this requirement. Allowance shall be made on turns and tangents for a bus to pull around a stalled or parked bus.
