

## Suncoast Polytechnical High School Academic Policy

Suncoast Polytechnical High School is a magnet school with high standards and expectations for student academic success. Having demonstrated academic competency, it is expected that all students will put forth their best effort and seek extra assistance when needed.

All SPHS students must maintain a minimum academic requirement of a 2.5 Grade Point Average (GPA) and earn passing grades in all course work required for graduation. If at any time during the school year, any student who earns a GPA lower than 2.5 or fails a course required for graduation will be notified. An Academic Success Plan (ASP) will be implemented and/or the student will be put on Academic Probation. Parents will be notified and be expected to be a part of this process. A student who does not maintain the SPHS academic requirements will be required to return to their districted high school if interventions are not successful. Under these circumstances, the student will need intensive academic assistance and grade retrieval opportunities to graduate from high school.
