^AAvg HW Hours/Week: some weeks will demand more time outside of class than others, so this number is an estimate; some students may need to spend more/less time on certain courses, as each learner is different; the number of hours listed reflects the general consensus from students and teachers as to the amount of time most, but not all, students should expect to spend outside of class to master content and complete assignments on time.

Recommended PSAT scores predict that a student with that score has a 60% chance of earning a 3 or higher on the AP exam for that course. The link to the AP Course Expectancy Tables with recommended PSAT scores in this course catalog can be found using the following link. <https://appotential.collegeboard.org/app/welcome.do>

M = Math test score R+M = Reading + Math test scores R+W&L = Reading + Writing test scores

M + W & L = Math + Writing and Language test scores EBRW + M = Evidence-Based Reading and Writing + Math section scores

“Bi-weekly” means “once every two weeks”

Please note that the recommended PSAT score is used as a guideline through the CollegeBoard AP Potential and is intended to help students make informed course selections. It is not intended to discourage a motivated student from registering for an AP course.

****Grade Levels presented are recommended. Scheduling priority will be given to the stated Grade Level. Additional seats may be filled by underclassmen if they meet the requirements.***
