

# 7<sup>th</sup> Grade Accelerated Math

## Course 2 Advanced Mathematics - Year at a Glance

Course # 1205050

**A Note to Parents:** The Florida state standards require math teachers plan lessons that build knowledge of various mathematical concepts, develop the ability to apply these concepts, and engage students in critical thinking and discourse. All standards in the state course description are designed to be learned by the end of the course.

**Please note the units of study listed below indicate the course sequence. Instructional pacing may vary. Specific questions regarding when content will be addressed in a specific course are best answered by the individual teacher.**

### Course Description

In grade 7 accelerated, instructional time will emphasize six areas: (1) representing numbers in scientific notation and extending the set of numbers to the system of real numbers, which includes irrational numbers; (2) generating equivalent numeric and algebraic expressions including using the Laws of Exponents; (3) creating and reasoning about linear relationships including modeling an association in bivariate data with a linear equation; (4) solving linear equations, inequalities and systems of linear equations; (5) developing an understanding of the concept of a function and (6) analyzing two-dimensional figures, particularly triangles, using distance, angle and applying the Pythagorean Theorem.

Curricular content for all subjects must integrate critical-thinking, problem-solving, and workforce-literacy skills; communication, reading, and writing skills; mathematics skills; collaboration skills; contextual and applied-learning skills; technology-literacy skills; information and media-literacy skills; and civic-engagement skills.

Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

### CPALMS Link

Please follow the link below to learn more about the course expectations, the course standards, and to access student resources. The student resources include Florida Department of Education recommended resources that students can use to learn the concepts and skills in this course. After clicking the link, please make sure you are in the "2022 and Beyond" tab on the website. This will ensure you are looking at our new B.E.S.T. Standards.

	Module of Study	Module Sequence
<b>Quarter 1</b> Aug 10 – Oct 12 45 Days	Module 1: Exponents and Scientific Notation	<ul style="list-style-type: none"> <li>Rational numbers</li> <li>Products and quotients of powers</li> <li>Power of powers</li> <li>Negative exponents</li> <li>Multiply and divide monomials</li> <li>Multiply linear expressions</li> <li>Factor algebraic expressions</li> <li>Power of a monomial</li> <li>Scientific notation</li> <li>Compute with Scientific notation</li> </ul>
	Module 2: Real Numbers	<ul style="list-style-type: none"> <li>Roots</li> <li>Solve equations involving roots</li> <li>Real numbers</li> <li>Estimate irrational numbers</li> <li>Compare and order real numbers</li> </ul>
	Module 3: Equations	<ul style="list-style-type: none"> <li>Solve two-step equations: <math>px + q = r</math></li> <li>Use two-step equations to solve problems</li> <li>Solve two-step equations: <math>p(x + q) = r</math></li> <li>Equations using bar diagrams</li> <li>Equations using algebra tiles</li> <li>Use more two-step equations to solve problems</li> </ul>
<b>Quarter 2</b> Oct 13 – Dec 22 46 days	Module 4: Multi-Step Equations and Inequalities	<ul style="list-style-type: none"> <li>Solve equations with variables on each side</li> <li>Write and solve equations with variables on each side</li> <li>Solving Multi-step Equations</li> <li>Write and solve multi-step equations</li> <li>Determine number of solutions</li> <li>Solve two-step inequalities</li> <li>Write and solve two-step inequalities</li> </ul>
	Module 5: Proportional Relationships	<ul style="list-style-type: none"> <li>Ratios and proportional relationships</li> <li>Use ratios to convert measurements</li> <li>Understand proportional relationships</li> <li>Tables of proportional relationships</li> <li>Graphs of proportional relationships</li> <li>Equations of proportional relationships</li> <li>Solve problems involving proportional relationships</li> <li>Scale drawings</li> </ul>
	Unit 6: Linear Equations	<ul style="list-style-type: none"> <li>Linear relationships</li> <li>Slope of a Line</li> <li>Similar triangles and slope</li> <li>Proportional Relationships</li> <li>Slope-Intercept Form</li> <li>Graph linear equations</li> <li>Interpret linear relationships</li> </ul>
<b>Quarter 3</b> Jan 10 – Mar 10	Module 7: Functions	<ul style="list-style-type: none"> <li>Relations and Functions</li> <li>Function tables</li> <li>Determine Linear and Non-Linear Functions</li> </ul>

42 Days		<ul style="list-style-type: none"> <li>Analyze Graphs of functions</li> </ul>
	Module 8: Systems of Linear Equations	<ul style="list-style-type: none"> <li>Systems of Equations</li> <li>Solve systems of equations</li> <li>Determine number of solutions</li> <li>Non-integer solutions</li> <li>Use systems of equations to solve problems</li> </ul>
	Module 9: Circles and Cylinders	<ul style="list-style-type: none"> <li>Circumference of circles</li> <li>Area of circles</li> <li>Surface area of circles</li> <li>Volume of circles</li> </ul>
	Module 10: Angles, Triangles, and the Pythagorean Theorem	<ul style="list-style-type: none"> <li>Adjacent &amp; Vertical Angles</li> <li>Complimentary and Supplementary Angles</li> <li>Angle relationships and triangles</li> <li>Angle relationships and polygons</li> <li>Pythagorean Theorem</li> <li>Converse of the Pythagorean Theorem</li> <li>Triangle inequality theorem</li> <li>Distance on the coordinate plane</li> </ul>
<b>Quarter 4</b> Mar 21 – May 26 44 Days	Module 11: Transformations, Congruence, and Similarity	<ul style="list-style-type: none"> <li>Translations</li> <li>Reflections</li> <li>Rotations</li> <li>Congruence and transformations</li> <li>Dilations</li> <li>Similarity and transformations</li> <li>Indirect measurement</li> </ul>
	Module 12: Bivariate Data and Statistical Displays	<ul style="list-style-type: none"> <li>Construct scatter plots</li> <li>Scatter plots and line graphs</li> <li>Draw lines of fit</li> <li>Circle graphs</li> <li>Select an appropriate display</li> </ul>
	Module 13: Probability	<ul style="list-style-type: none"> <li>Repeated experiments</li> <li>Theoretical probability of repeated experiments</li> <li>Relative frequency of repeated experiments</li> <li>Make predictions</li> </ul>

### Course Resources

**Core Textbook:**

Florida Reveal Math - Students have online access through [My.SarasotaCountySchools.net](http://My.SarasotaCountySchools.net)

**F.A.S.T. Assessment Information:**

<https://flfast.org/>

<https://flfast.org/-/media/project/client-portals/florida-fast/pdf/fast-facts.pdf>

**Supplemental Resources:**

i-Ready - Students log in through [My.SarasotaCountySchools.net](http://My.SarasotaCountySchools.net)

ALEKS – Students log in through [My.SarasotaCountySchools.net](https://my.sarasotacountyschools.net)

[Khan Academy](#)

For additional supplemental resources, please see your child's course syllabus.
